**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election of Group I, species A (claims 1-13, 15-17 and 19) in the reply filed on 24 March 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 14, 18 and 20-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 24 March 2005.

***Specification***

3. The abstract of the disclosure is objected to because in lines 1 and 3, "comprising" should be - - including - - and in line 2, "said" should be - - the - - (legal or claim-type phraseology should not be used in the abstract). Correction is required. See MPEP § 608.01(b).
4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the

Art Unit: 1732

abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

#### ***Allowable Subject Matter***

5. Claims 1-13, 15-17 and 19 are allowable over the prior art references presently of record.

6. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references presently of record, alone or in combination, disclose, suggest or teach a process of making a biocompatible porous prosthesis including the steps of applying a solution to a porous support structure (as set forth in independent claims 1 and 15), or submerging a porous support structure in a solution (as set forth in independent claims 13 and 19).

#### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references are of interest.
